# Why Should You Join CISS?

CISS, short for Computer Information and Support Services, may be the class you need to take. The class offers much for you to gain, even if you don't go into the I.T. field. You get training, experience, certifications, and job opportunities.

Training in the field of technology and gain experience

-Computer tear down and rebuilds
-Setup a server and an intranet
-Wi-Fi setup and management
-IOT projects

Certifications in Microsoft software and computer operation

-CompTIA ITF+ & CompTIA A+
-Microsoft Word, PowerPoint, Outlook, Access, and Excel
-IC3 Digital Literacy GS6
-CPR First Aid

Personal Protection

Some think that it's very dangerous to work with computers as they can be shocked, however we put ESD straps on our arms in lab to make sure any electricity generated is dispersed away from us. You are also taught how to stay cautions around electoral shocks and discharges that can cause damage to computer components.

Financial Opportunities

*Starting out in the field, you can earn a yearly salary varying from **$42,390** and **$52,720** starting as a level one help desk.*

Knowing there's training, experience, certifications, and even job opportunities, what reason is there not to join CISS?
